Michigan Supreme Court:

I am a retired steel worker who has contracted asbestosis. I don't want to lose the right to a jury trial.

The Michigan Constitution and United States Constitution states judges are not to make new laws but to interpret the law. Why is the Michigan Supreme Court trying to change this policy? Don't give our state a bad name by being the first and only state to take away our right of a jury trial, for people suffering losses and damages.

Furthermore I understand there has only been one asbestos case tried in Michigan in the last four years. How can you say the courts have been clogged by these cases?

Please give us our God given right to a jury trial if it is necessary.

Sincerely,

Refer to:

Proposed Court Rule No. 2003-47
